Mathematical Biosciences

an international journal

Volume 120

HEIN STIGUM, W. FALCK, AND P. MAGNUS (Oslo, Norway)
The Core Group Revisited: The Effect of Partner Mixing and Migration on the Spread of Gonorrhea, Chlamydia and HIV 1
YUANHUA TANG AND HANS G. OTHMER (Salt Lake City, Utah)
A G Protein-Based Model of Adaptation in *Dictyostelium discoideum* 25
YANG KUANG (Tempe, Arizona) AND YASUHIRO TAKEUCHI (Hamamatsu, Japan)
Predator–Prey Dynamics in Models of Prey Dispersal in Two-Patch Environments 77
BERNARD DACOROGNA, FRANÇOIS WEISSBAUM, AND ROGER ARDITI (Lausanne, Switzerland)
Maximum Sustainable Yield with Continuous Age Structure and Density-Dependent Recruitment 99
N. HOOKE, C. S. HENRIQUEZ, P. LANZKRON, AND D. ROSE (Durham, North Carolina)
Linear Algebraic Transformations of the Bidomain Equations: Implications for Numerical Methods 127
NIKOLAUS BECKER AND WERNER RITTGEN (Heidelberg, Germany)
Fitting Epidemiologic Follow-Up Studies with Cumulative Damage Models 147
PETER R. JOHNSON, STEPHEN J. WALKER, JARI A. K. HYTTINEN, AND DAVID KILPATRICK (Hobart, Australia)
Inverse Electrocardiographic Transformations: Dependence on the Number of Epicardial Regions and Body Surface Data Points 165
NATALIA TRAYANOVA (Durham, North Carolina)
An Approximate Solution on the Periodic Bidomain Equations in One Dimension 189
ANNETTE KOPP-SCHNEIDER (Heidelberg, Germany) AND CHRISTOPHER J. PORTIER (Research Triangle Park, North Carolina)
A Stem Cell Model for Carcinogenesis 211
DANIEL ZELTERMAN, PATRICIA M. GRAMBSCH, CHAP T. LE, JENNIE Z. MA, AND JAMES W. CURTSINGER (Minneapolis, Minnesota)
Piecewise Exponential Survival Curves with Smooth Transitions 233

Elsevier
